FINANCIAL PERFORMANCE ANALYSIS

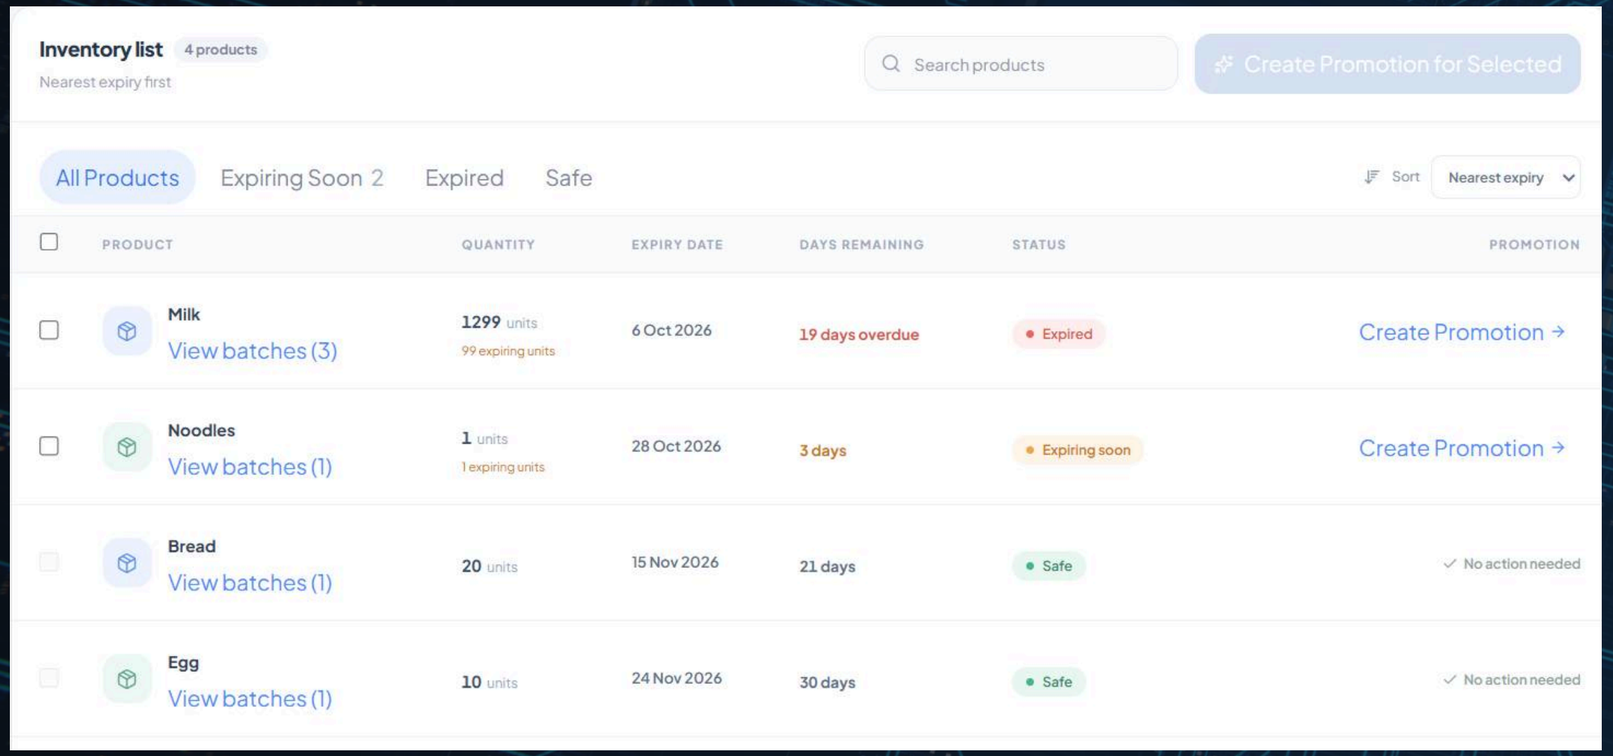

- **Automatic Calculations** — Track revenue, expenses, net profit and profit margin.
- **Visual Analytics** — Compare revenue and expenses using charts and profit trends.
- **Financial Health Alerts** — Highlight low-profit situations to support better decisions.
- **Product Performance** — Identify best-selling and slow-selling products.

INVENTORY & EXPIRY MANAGEMENT

- **Real-Time Inventory Tracking** — Monitor product quantities and stock information.
- **Automatic Expiry Detection** — Identify products that are expiring soon or already expired.
- **Stock Risk Alerts** — Highlight inventory at risk of being wasted.
- **Easy Stock Management** — Add new products and receive additional stock with automatic updates.

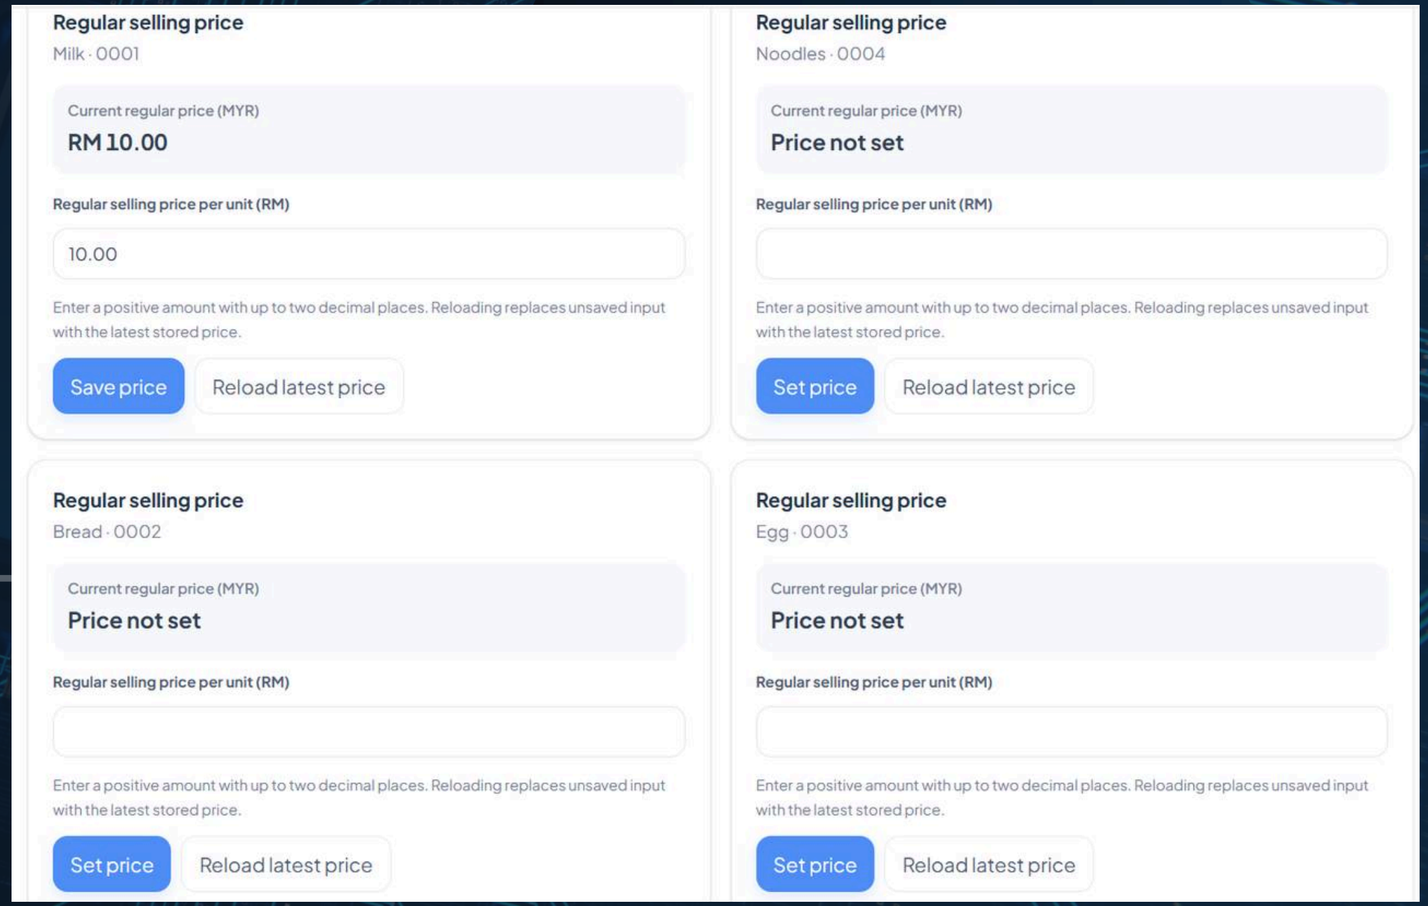

INVENTORY TRACKING & EXPIRY STATUS

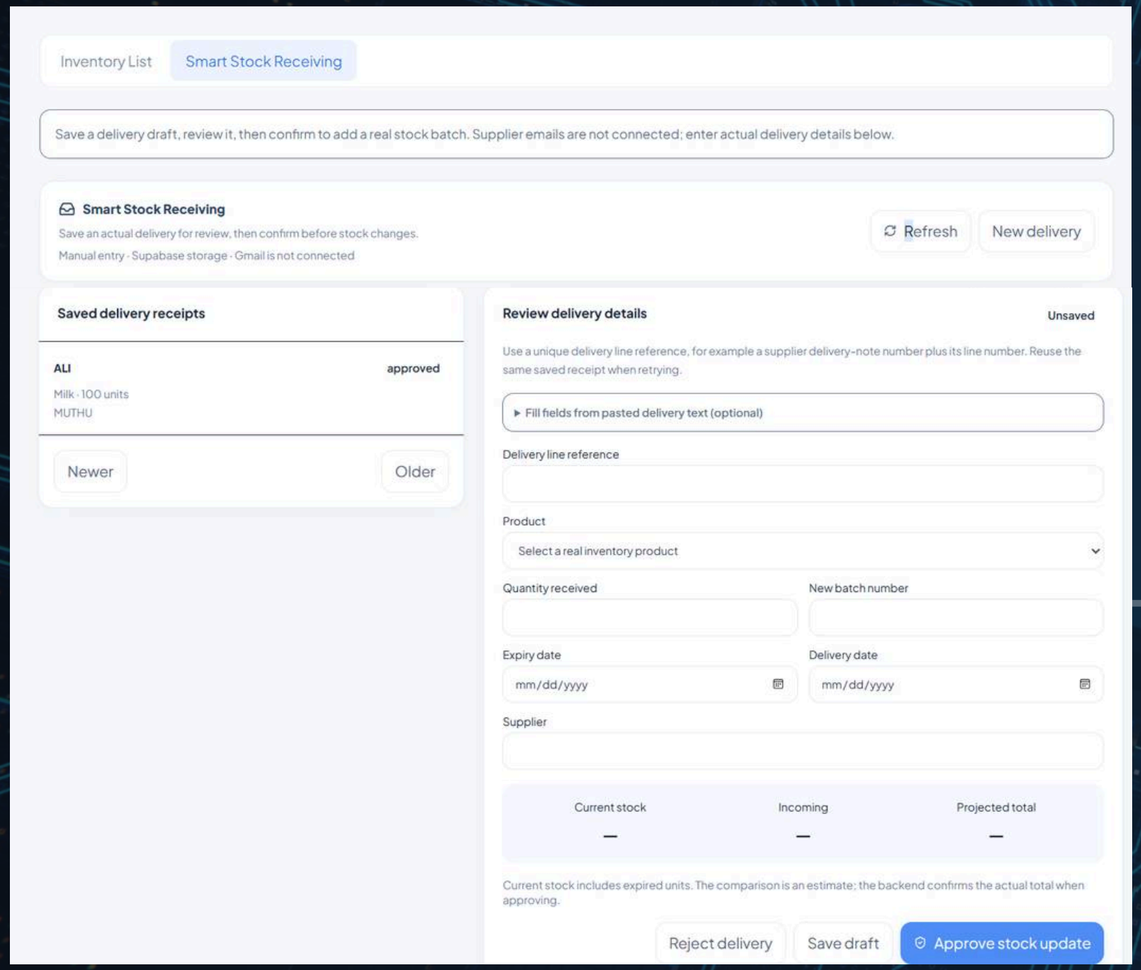

- **Product Monitoring** — View product names, quantities, expiry dates and remaining shelf life.
- **Expiry Classification** — Automatically classify products as Expired, Expiring Soon or Safe.
- **Batch-Level Tracking** — Manage multiple stock batches with different expiry dates.
- **Smart Promotion Access** — Select eligible batches and send them to AI Promotions.

PRODUCT SELLING PRICE MANAGEMENT

- **Set Selling Prices** — Assign a regular selling price to each product.
- **Centralised Price Management** — Manage prices for Milk, Noodles, Bread, Eggs and more.
- **Flexible Price Updates** — Change and save prices whenever needed.
- **Database Integration** — Store selling prices securely in Supabase for future reference.

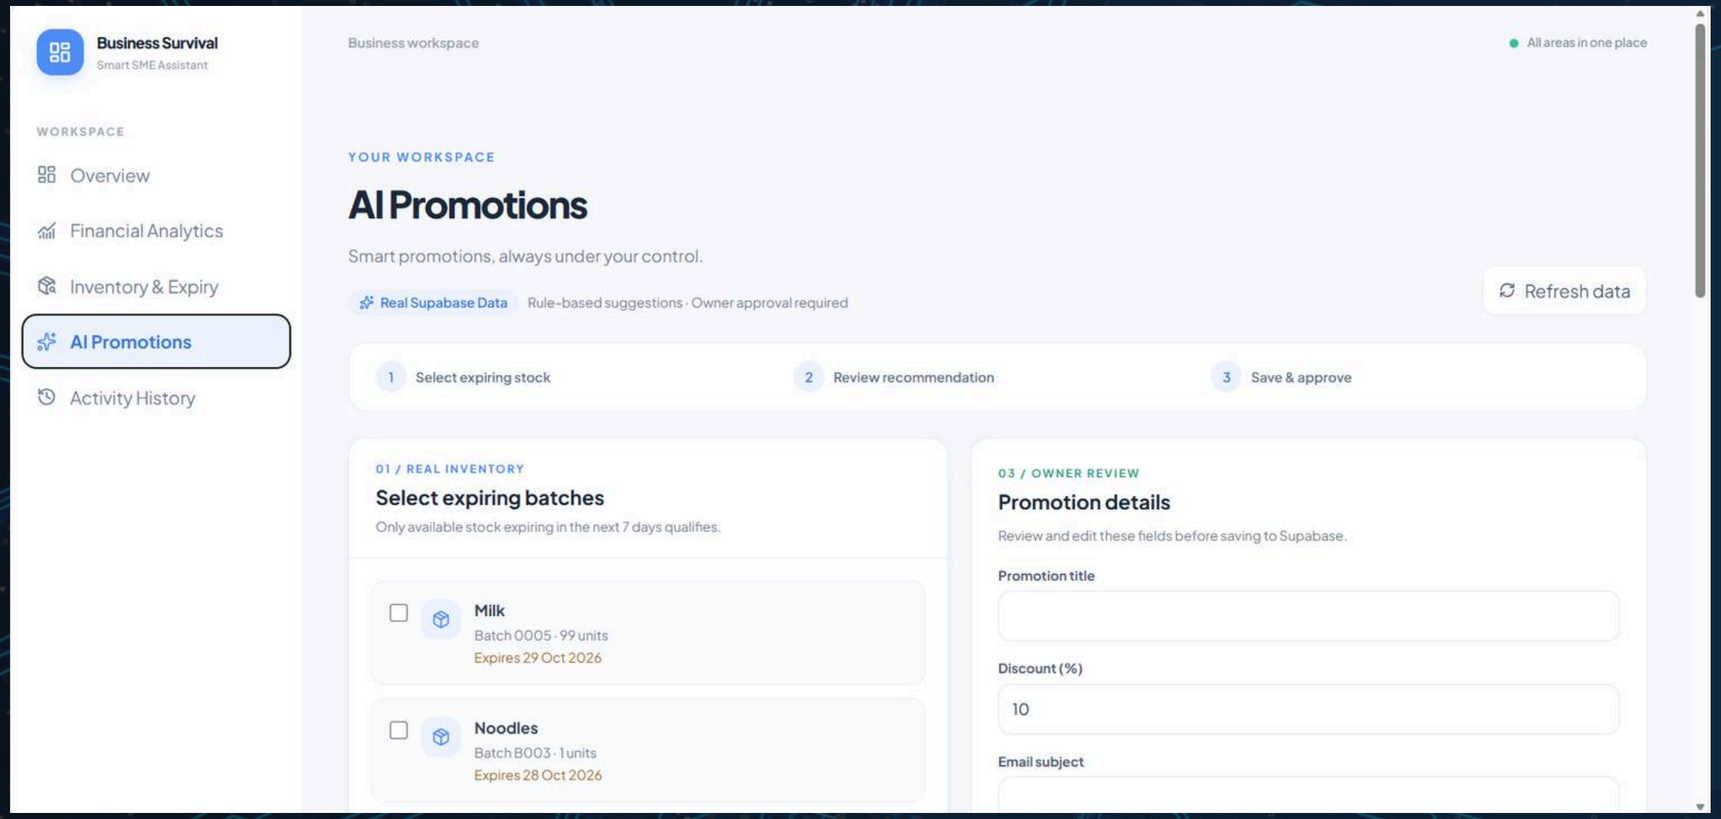

SMART STOCK RECEIVING

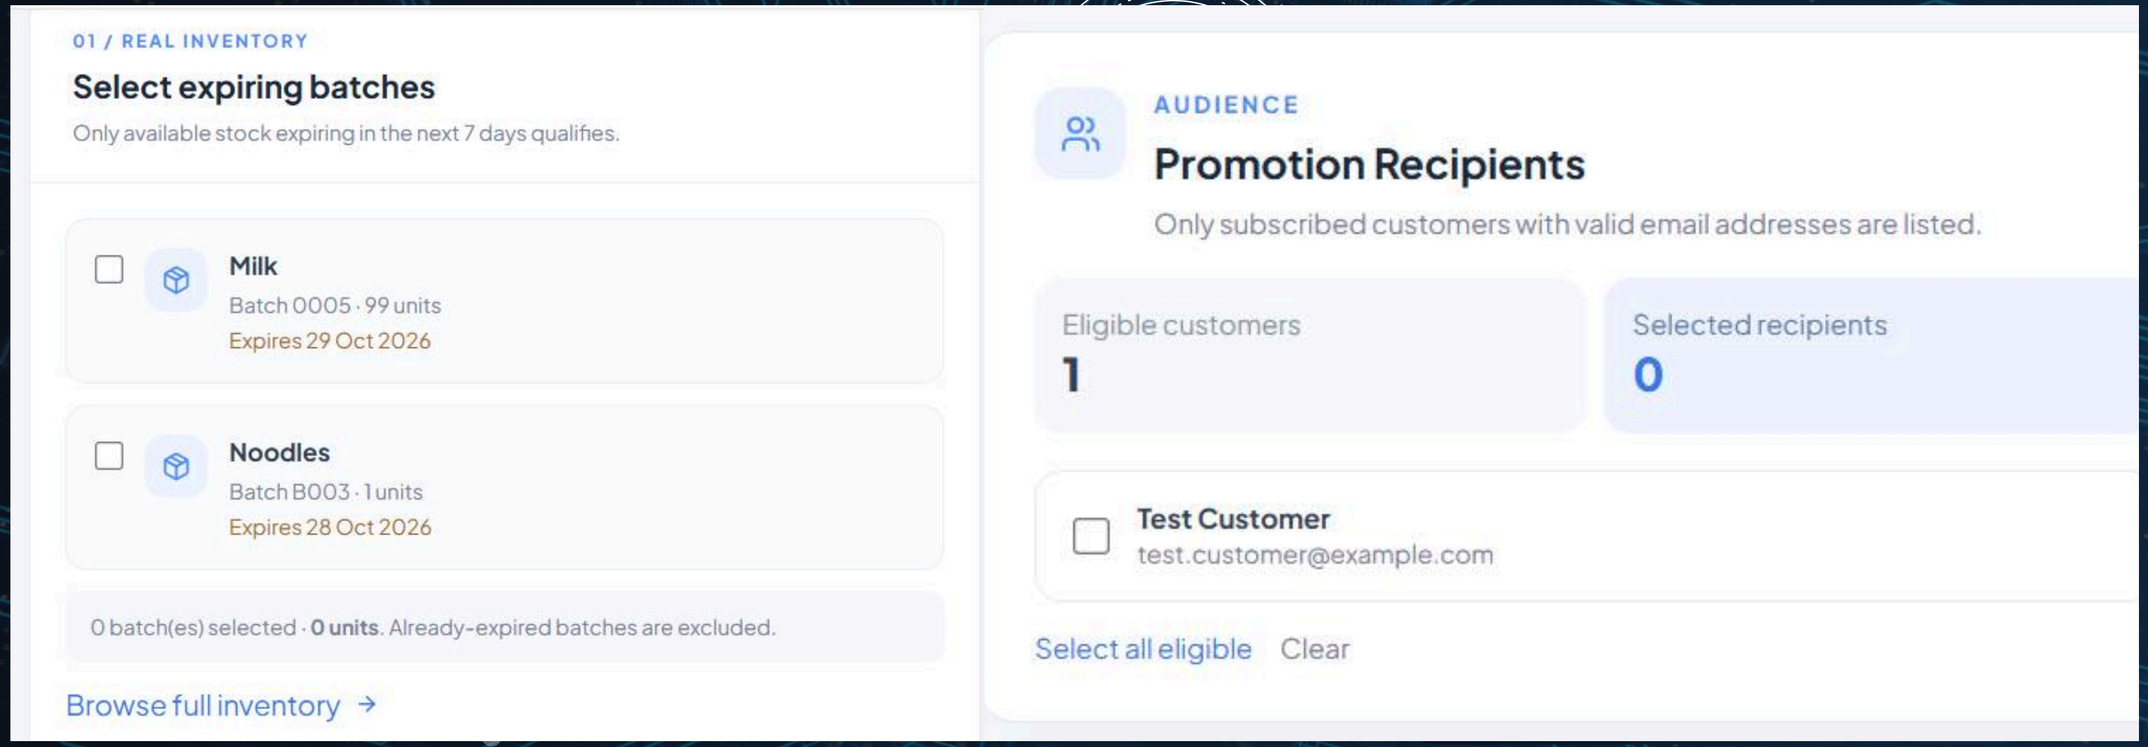

- **Delivery Recording** — Enter product details, supplier, quantity, batch number and expiry date.
- **Stock Verification** — Compare current stock with incoming quantities.
- **Human Approval** — Review and approve deliveries before inventory is updated.
- **Automatic Inventory Updates** — Approved stock is added to the inventory database.
- **Delivery History** — Keep records of saved and approved deliveries for future reference.

SMART AI PROMOTION SYSTEM

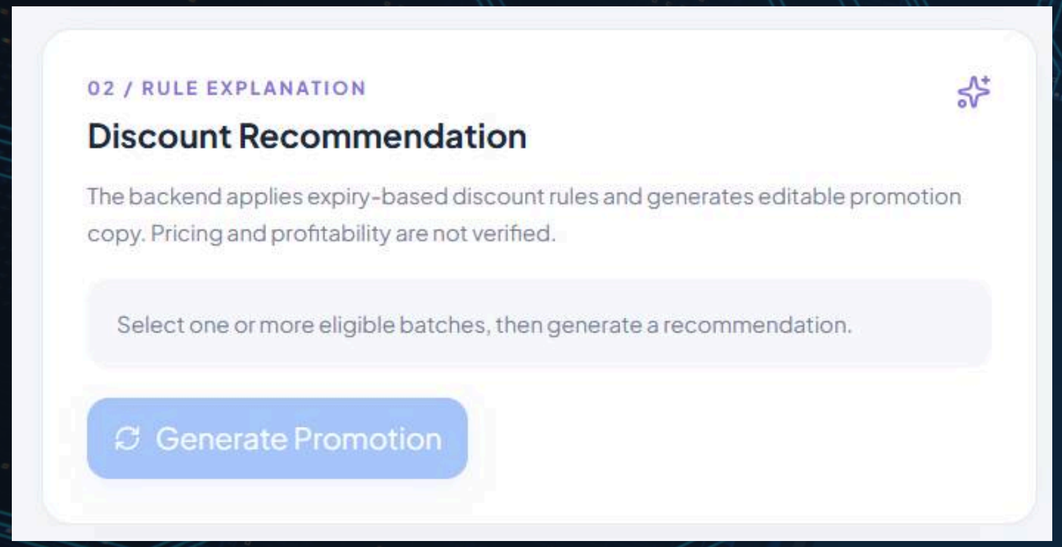

- **Expiry-Based Detection** — Identify eligible products approaching their expiry dates.
- **Google Gemini AI** — Generate promotional titles, email subjects and marketing messages.
- **Smart Discount Suggestions** — Recommend discounts using expiry-based business rules.
- **Human Control** — Business owners review and edit promotions before approval.
- **Reduce Potential Waste** — Encourage earlier action on products at risk of expiring.

SMART PROMOTION TARGETING

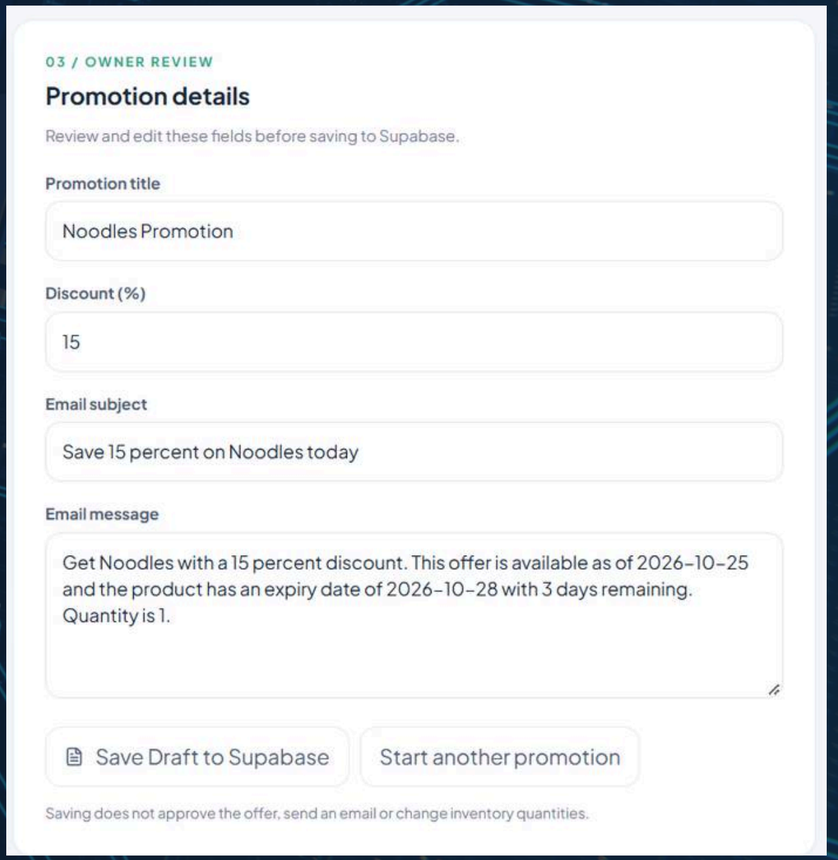

- **Expiring Stock Selection —** Choose available product batches expiring within the next 7 days.
- **Stock Eligibility Check —** Exclude expired products and batches without available stock.
- **Customer Selection —** Choose subscribed customers with valid email addresses.

AI PROMOTION GENERATION & REVIEW

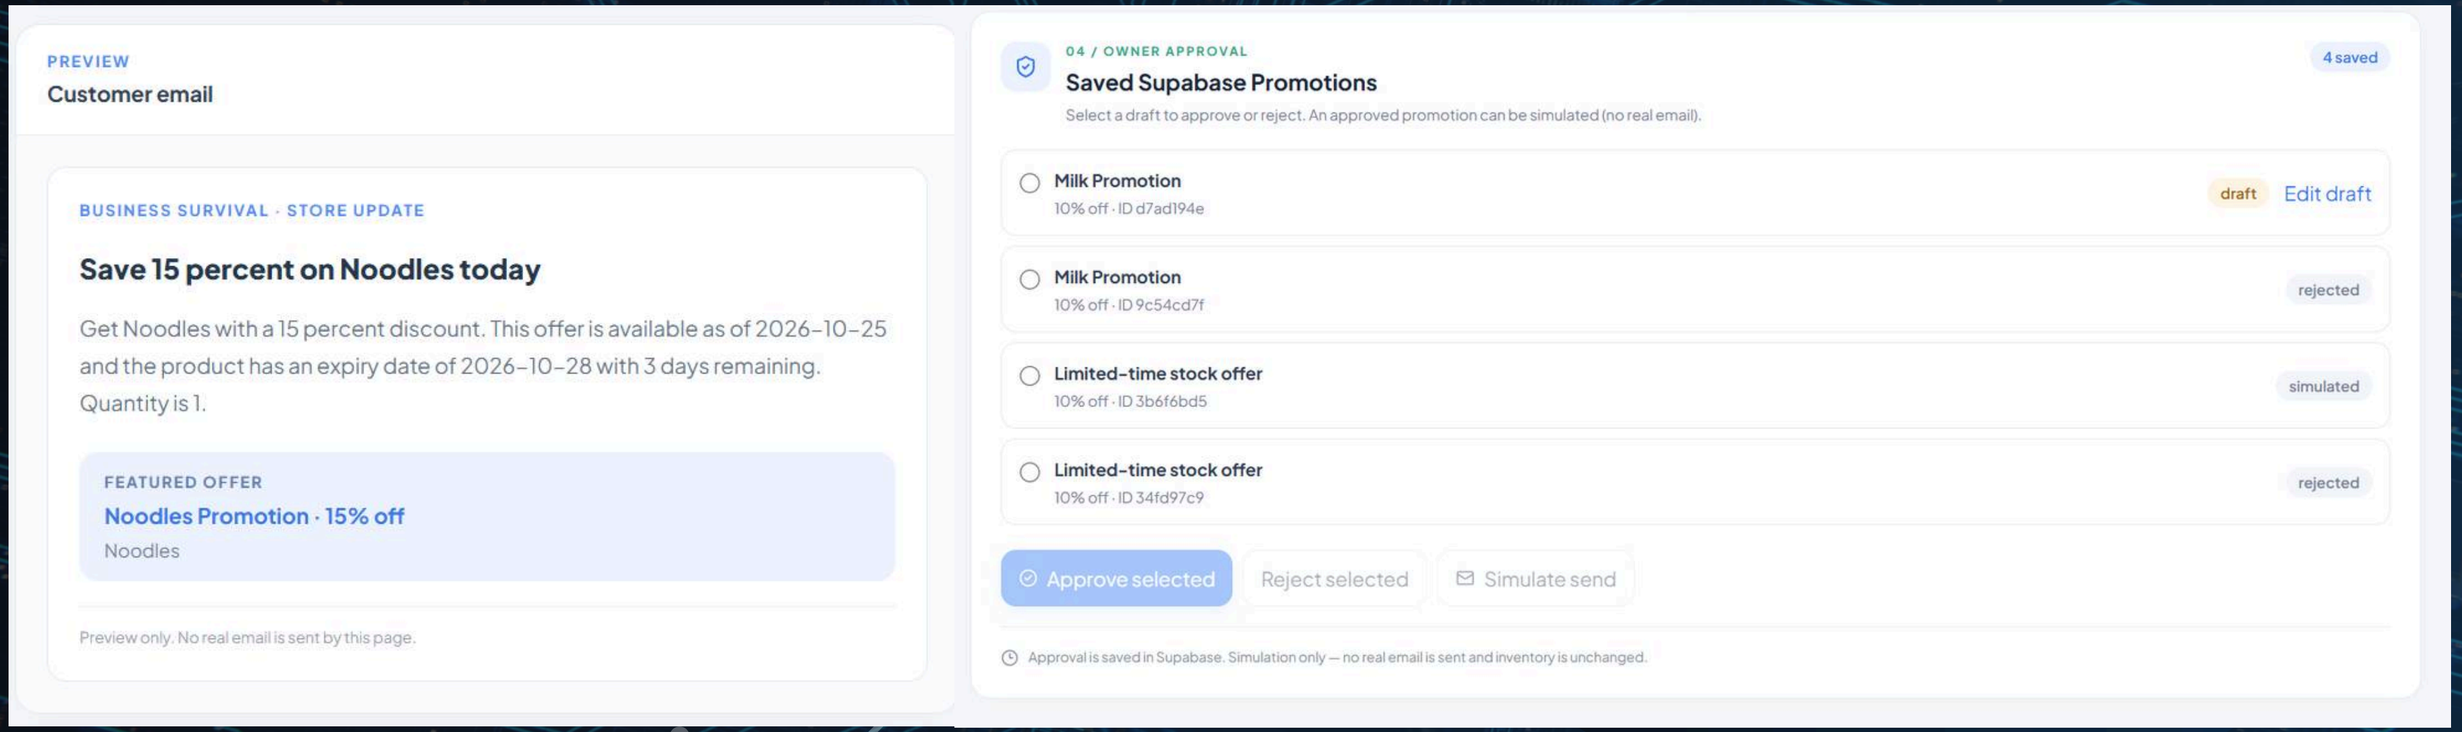

- **Automatic Discount Calculation** — Suggests discounts based on remaining days before expiry.
- **Google Gemini AI** — Generates promotion titles, email subjects and marketing messages.

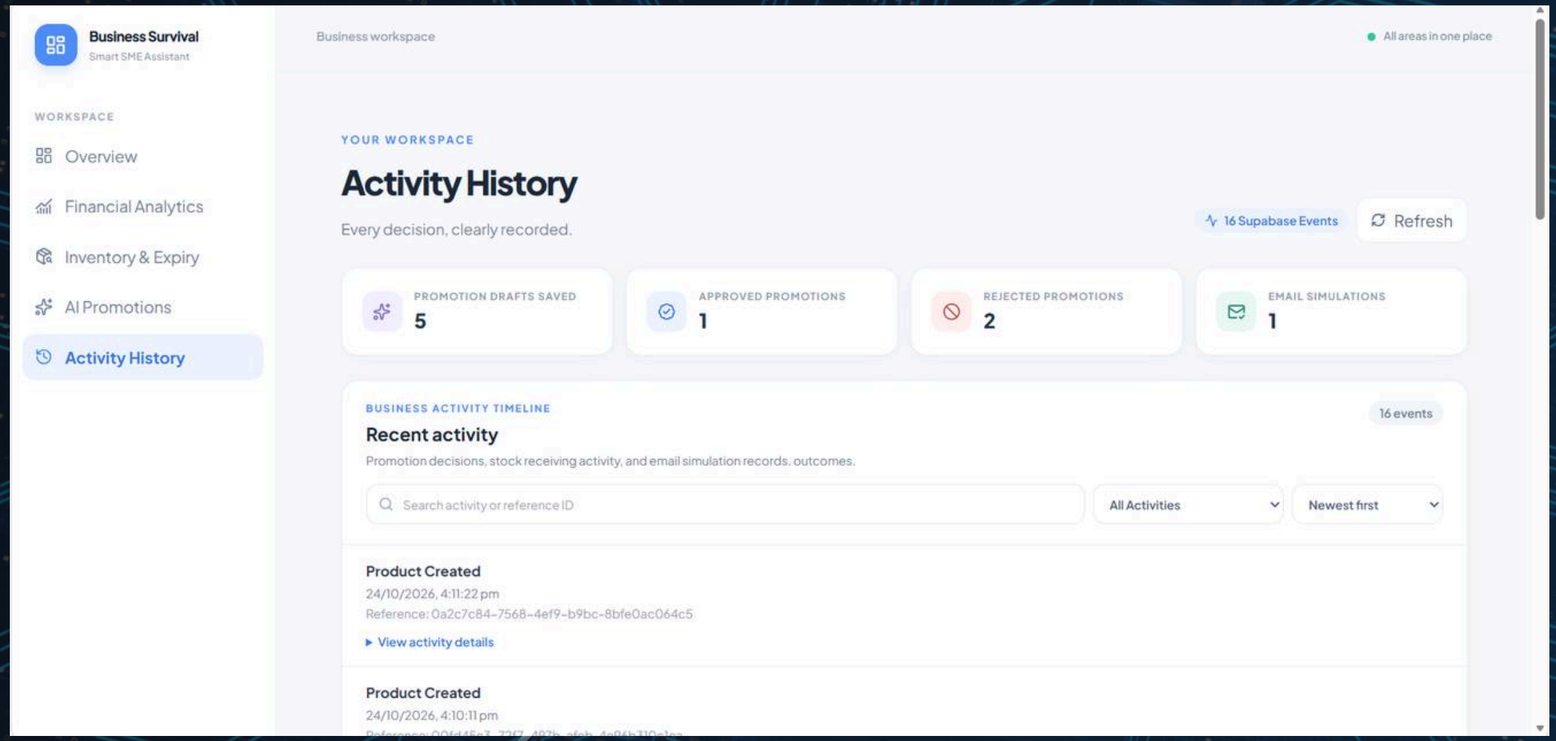

- **Editable Recommendations** — Business owners can review and customise the generated content.
- **Human Approval** — Promotions are saved as drafts before being separately approved.

PROMOTION APPROVAL & SIMULATION

- **Email Preview** — Review promotional messages before taking action.
- **Save Promotion Drafts** — Store generated promotions securely in Supabase.
- **Approve or Reject** — Business owners make the final decision.
- **Promotion Simulation** — Simulate approved promotions without sending real emails.
- **Promotion Status Tracking** — Monitor draft, rejected and simulated promotions.

ACTIVITY HISTORY

- **Automatic Activity Logging** — Records important business actions in Supabase.
- **Promotion History** — Tracks saved, approved, rejected and simulated promotions.
- **Search & Filter** — Easily find previous activities and transactions.
- **Detailed Records** — View activity details and references for better accountability.
- **Transparency & Control** — Helps business owners monitor decisions and review past actions.
